test

test: Transaction: Place order using ordering web site
 test: Database: Confirm in orders database
 test: Transaction: look for order in account web site
 test: Script: check order in legacy system
 test: Mail: Receive Confirmation Email
 test: Transaction: check shipping detail on UPS web site

752

①

select one or more groups and/or monitors that will be checked

Update every 756

amount of time between checks of a monitor

Title

title that should appear in the Monitor table (optional)

Add Monitor

Advanced Options

☐ Disable

temporarily disable monitor sampling and alerting

☒ Run Monitors

Run each monitor before checking.

☐ Single Session

Run all monitors in a single session - if this box is checked then URL monitors use the same set of cookies and the same connection to the server.

Monitor Delay

If running each monitor, delay in seconds between monitors

☐ Check All Monitors in Group(s)

By default, a group is counted as a single item when checking status. If this box is checked, all of the monitors in selected groups (and their subgroups) are checked and counted towards the totals.

☐ Verify Error

if the monitor detects an error, immediately perform the check again to verify the error.
